NIHON-SHU JAPANESE SAKÉ

Rice, Water, Kōji

- Seimaibuai: The degree to which rice has been polished before brewing.
- SMV: Saké Meter Value is a very general reference to the sweetness or dryness of a saké; + refers to dryness; - refers to sweetness.
- Ginjo: Premium saké made with rice polished between 50% and 60%.
- Daiginjo: Ultra premium saké made with rice polished to between 35% and 49%.
- Junmai: No alcohol added, just rice, yeast, koji and water.
- Tokubetsu Junmai: "Special" junmai made with rice polished to at least 65%.
- Honjozo: Saké with a small amount of brewer's alcohol added.
- Nigori: Roughly filtered saké that is cloudy.
- Kōji: Steamed rice onto which kōji-kin (which means kōji mold) has been cultivated. Kōji provides those enzymes to create the sugars for fermentation.

Saké is a beverage fermented from rice, similar to beer in the way it is made and close to wine for flavours and taste.

Saké is not a distilled beverage, and hence not related to gin, vodka or other spirits.

Prices subject to 10% service charge and prevailing government taxes
