INTRODUCING  
THE SAN MIGUEL  
TOWER OF  
POWER

### A Brief History of San Miguel

The history of San Miguel traces back to 1890, when a group of Spaniards decided to open the first brewery in Southeast Asia, specifically in Manila. The factory produced diverse types of beers and derivative products under the name "San Miguel". In the colonial capital no one knew beer until then. For this reason the inauguration of the brewery was a historic event and became known as "The day of San Miguel".

Today, San Miguel Beer—the Company's flagship product—is one of the largest selling beers and among the top 10 beer brands in the world.
